

PRO-MIC Update

Wireless Networking

Graphical Display on the Roll

Paperless Operation

View Profiles on your PC

Roll Inventory Software

Did you know your existing PRO-MIC can...

- Use **wireless networking** or your existing network to automatically pass its data to your roll shop network or company VAX.
- Display a profile on the roll using a **graphical LCD display**.
- Immediately display your roll profile to our **Visual Quantum Lite** software running on your PC and then print to **any Windows printer**.
- Automatically maintain a data file for **Microsoft Excel** to access.
- Manage your **roll inventory** with Visual Quantum RDM.
- Measure your **back up rolls too**. Transfer your existing PRO-MIC electronics unit to another PRO-MIC saddle - one electronics with two saddles.

PRO-MIC Update is a monthly publication dedicated to the betterment of Roll Profiling across the U.S.A. All information is deemed reliable unless corrected by you, the reader. This publication is produced with no advertising dollars and is therefore free from influence from political action committees or presidential candidates. The paper and ink used to produce PRO-MIC news may have some recycled content, while the articles surely do. Address comments to: info@pro-mic.com
